Abstract of JP10094510

PROBLEM TO BE SOLVED: To provide a dishwasher which is excellent in cleanness, cloud prevention and antibacterial performance of a washing tank and a door.
SOLUTION: This dishwasher 1 is provided with a washing tank 10 where dishes 31 are placed, a door 25 and a means 2 for jetting washing water. A layer containing a photo semiconductor is formed on the internal surface of the washing tank 10 while an ultraviolet lamp 21 is provided in the washing tank 10 to irradiate the layer containing the photo semiconductor with ultraviolet rays. The layer containing the photo semiconductor is formed on the internal and external surfaces of the door 25 made of glass.
